Hello and Welcome to My Creative Space!

Feel free to explore and learn more about my work and skills!

localhost:5173/#contact

I'm a passionate software developer with a Master's degree in Computer Science from New York **Institute of Technology**. I specialize in crafting intelligent software systems, blending the power of AI, machine learning, and full-stack development to build scalable, data-driven web applications and cloud-native solutions.

What I Do

My work spans across a variety of cutting-edge technologies:

- Architecting **AI-powered tools** using Large Language Models (LLMs)
- Building automated systems that learn, adapt, and evolve
- Developing intuitive web apps with Vue.js, React, and Node.js
- Leveraging **cloud services** (GCP, AWS) to deploy and scale applications
- Creating AI pipelines for data analysis, summarization, and natural language processing (NLP)

Education

localhost:5173/#contact 2/5

New York Institute of Technology

Master of Science in Computer and Information Science

Graduated: 2024

Aurora Technological and Research Institute

Bachelor of Technology in Computer Science

Graduated: 2020

MJPBCWRES School

High School

Graduated: 2014

Frontend

HTML CSS JavaScript

Backend

Node.js Express Java Go
